Georgia Tech Professional Master’s Degrees

Advance your career without interrupting it.
Earn a Georgia Tech Graduate Degree.

» Designed for working professionals aspiring to leadership positions.

Our three professional master’s degrees enable you to combine your technical capabilities with business and leadership skills. This hybrid learning experience includes online and face-to-face classes, interspersed with three campus visits, offering the flexibility you need to balance your schedule and lifestyle. You will progress through the program with your cohort, which will spur rich discussions and enable you to draw from each other’s experiences.

» In addition to a sought-after credential from a top-ranked research university, you can also expect:

- World-class, expert faculty
- Media-rich, digital learning tools
- High quality, rigorous courses
- Ready-to-use knowledge that’s immediately applicable

The proven excellence of Georgia Tech graduate degrees and the convenience of online delivery make them a compelling choice for working professionals.
Master’s in Applied Systems Engineering (PMASE) is a comprehensive systems engineering program offered at Georgia Tech. By mirroring real-world projects, you’ll collaborate, create project plans, and identify risk areas and solutions. This degree will enable you to understand each component of the project life cycle and apply it in real-time.

Master’s in Manufacturing Leadership (PMML) will enable you to propel your organization forward by working on real-world problems to build your skills in operations and personnel management. You’ll learn how to boost operations and performance by employing essential concepts, like sustainable system design and continuous improvement, while enhancing your ability to lead change and handle conflict.

Master’s in Occupational Safety and Health (PMOSH) will help you learn how to produce first-rate action plans, improve current safety and health programs, as well as successfully apply business, technological, and analytical insights to any challenge that comes your way.

“My career potential was limited, and I knew I needed better tools to take advantage of the skills I possessed. Now, I’m able to make a real impact.”

—JOHN BLISS
Senior Project Manager
GE Oil & Gas

“The best thing about this degree is we are applying as we learn. We do activities and projects in every course.”

—SHEELA SHAW
Principal Analyst
Manhattan Associates
